

Project Manager- Eagle Ford

Goodnight Midstream owns and operates an extensive network of reliable produced water gathering and disposal systems in three of the county's most active oil plays - the Williston Basin, the Permian Basin and the Eagle Ford shale.

Our midstream approach minimizes environmental impact and improves health and safety while lowering lease operating expense and improving reliability for our customers. Goodnight is supported by a team of highly experienced engineers and operating professionals.

Job Summary

The Eagle Ford Project Manager will direct, coordinate, and oversee the construction of a 30 mile produced water gathering system and multiple saltwater disposal wells. The Project Manager will develop schedules and budgets as well as allocate resources for the project. In addition, the Project Manager will develop and monitor timelines and operational deliverables and report to the Vice President of Eagle Ford Operations. Extensive construction experience and established proficiency in Health, Safety and Environmental programs will be required.

Responsibilities

- Plan and implement construction of pipelines and saltwater disposal facilities
- Define project scope, goals and deliverables
- Define tasks and required resources
- Manage, direct and select project team and third-party vendors
- Manage project budget and allocate project resources
- Create schedule and project timeline, ensure schedule is on track
- Lead quality assurance
- Oversee construction
- Manage and report daily reports and cost estimates

Education and Experience:

A Bachelor's degree in engineering is preferred. Minimum of 5 years of oilfield and or related facility experience required. Salt water disposal experience preferred. Strong project management experience is required, along with experience in strategic planning, risk management, and/or change management. The ideal candidate will possess a technical background with hands-on field experience and strong working knowledge of MS Office.

Candidate must possess valid driver's license and clean driving record.

Working Environment/Physical Requirements:

Working conditions will require frequent work in outdoor environments requiring safety procedures and exposure to varying and possibly extreme weather conditions. This position must be able to operate in a construction environment up to 50% of the time. Must be able to occasionally climb ladders, crawl, crouch and kneel. Occasional lifting required up to 50 lbs. This position requires frequent communication and exchange of information verbally and in writing. Work in adverse driving and inclement weather conditions, and occasional work with and around high-pressure water pipelines, possibly toxic chemicals and flammable products, moving and/or hot and cold equipment, and high noise levels. Operates a vehicle at least 50% of the time. Must be willing to work outside of normal business hours and have a flexible schedule
