

I&E Foreman

Goodnight Midstream provides professional fluids management services to oil and gas producers. The Company owns and operates an extensive network of water gathering pipelines and salt water disposal wells focused on gathering and disposing of produced saltwater. Goodnight is supported by a team of highly experienced engineers and operating professionals. We offer our customers reliable produced water gathering and disposal systems in three of the country's most active oil plays, the Williston Basin, the Permian Basin, and the Eagle Ford shale, and have an emerging presence in Wyoming's Powder River Basin.

Job Summary: This exempt-level role will be responsible for planning, designing, testing and maintenance of electrical systems and equipment, in their assigned geographical area. This is a working supervisor position, who will also provide guidance and work duties to the I&E technician(s)

Responsibilities

- Manage all facets of I&E/automation maintenance program supporting company pipeline and facility operations
- Working closely with the Operations Foremen and Automation Department on troubleshooting and resolving I&E and automation issues.
- Working closely with electrical contractors to coordinate high voltage work, as may be necessary
- Develop and manage an I&E preventative maintenance program
- Utilize the FIIX CMMS system to manage and document maintenance activities
- Work with I&E and automation personnel as needed to maintain I/O from device, through PLCs and into SCADA systems
- Day-to-day reactive maintenance and repair, including hands on troubleshooting, as well as contractor management and work/quality inspection.
- Supervising I&E Technicians through motivation, training and development, to achieve a safe, efficient and cost-effective operation;
- Proactively identifying potential or developing field issue and alerting managers for proactive remediation.
- Assisting Capital Projects Team in commissioning efforts for Pipeline, SWD and other facility start-ups.
- Assisting with commissioning of transfer skids and new customer connections
- Maintain video monitoring system equipment and support Operations and IT organization.
- Providing remote and on-site support for automation issues at SWD locations.
- Ensuring compliance with Company policies and safety requirements and protocols.

Required Education and Experience:

Two-year degree or completion of trade school preferred; Minimum of 5-7 years of directly related Oil and Gas industry work experience; 2-4 years of supervisory experience and prior field instrumentation and electrical experience required. Experience with SCADA integration, Wonderware or comparable program is also needed for this role.

Other Job Requirements: Must have the ability and willingness to spend long hours in the field during critical activities. MS Office proficiency and high level of comfort with computers and various technology.

The candidate should be highly skilled in the following areas: problem solving, task prioritization, active listening, verbal and written communication skills. This position requires a self-starter/self-learner that demonstrates clear accountability and can adapt easily whether working independently or with a team. The candidate must have a strong sense of urgency and sound judgment. Must possess a strong work ethic, ability to manage multiple projects and staff simultaneously and meet deadlines.

I&E Foreman
